(Failure to provide a detailed description may cause a delay in processing.)

The three (3) 20,000 gallon tanks are designed to hold non-potable water all year around and will not be fully filled. During rainstorms, stormwater will collect in a settlement basin at the bottom of the debris basin. The settlement basin will have a volume equal to the storage tanks (60,000 gallons). While the stormwater sits in the settlement basin, up to several days, the non-potable water in the tanks is being used for irrigation to free up enough storage space for the collected stormwater.
